EDUCATION

- **Rice University**
  B.S. Computer Science & Math, GPA: 3.87/4.0
  August 2020 - May 2024
- **The Kinkaid School**
  GPA: 12.0/11.0
  August 2016 - May 2020

EXPERIENCE

- **Research**
  Undergraduate Researcher
  Surveying latest techniques and methods for symbolic regression under supervision of Dr. Meng Li.
  September 2021 to Present
- **COMP 140**
  Teacher's Assistant
  Assisting students with assignments and understanding of course material during office hours as well as grading assignments and exams.
  August 2021 to Present
- **RiceApps**
  Mobile App Developer
  Implemented calendar integration for upcoming art events and fixed UI bugs for the Rice Public Art App.
  June 2021 to August 2021
- **Chemstations**
  DevOps Intern
  Helped develop a continuous integration and continuous delivery pipeline for ChemCAD 7 software with Jenkins and Subversion, enabling automatic compilation and testing of code when committing to Source Code Manager.
  December 2019 to January 2020

AWARDS & RECOGNITION

- **National Merit Scholarship Recipient**
  2020
- **The Statistics Award**
  The Kinkaid School
  2019

SKILLS & COURSEWORK

- **Languages**
  Python, R, Java, JavaScript
- **Tools & Technologies**
  HTML5/CSS, React/React Native, LaTeX, Git/GitHub
- **Skills**
  Problem Solving, Data Analysis, Data Wrangling, Data Visualization, Program Design
- **Coursework**
  Computational Thinking, Data Structures, Algorithms, Program Design, Tools and Models for Data Science, Discrete Math, Elements of Analysis, Linear Algebra, Calculus I, II, & III, Probability

PROJECTS

- **Volleyball Markov** `[GitHub]`
  Designed and implemented a Markov chain model that models the progression of a volleyball rally to create a better and less subjective passing metric. Submitting paper to MIT Sloan Sports Analytics Conference Paper Competition.
  R
- **Volleyball Linear Regression** `[Poster]`
  Finalist in the 2020 MIT Sloan Sports Analytics Conference Poster Competition. Designed and implemented a linear regression model that that explains 95% of the variation in win percentage for NCAA Division 1 Men's Volleyball Teams.
  R
- **Graph Traversal**
  Implemented BFS, Recursive DFS, Iterative DFS, and Dijkstra's algorithm to find routes between locations on the Rice campus.
  Python
